SUMMARY

Computer Science graduate with nearly two years of industry experience across enterprise CMS platform operations (Accenture/Chubb) and native Android development (Zoho). Holds two Canadian post-graduate diplomas in Data Analytics and Big Data Solutions Architecture. Comfortable working across the full delivery lifecycle — from content operations and QA to API integration and performance debugging — on platforms serving Fortune 500 clients and 100,000+ active users. Eligible to work for any Canadian employer without sponsorship.

WORK EXPERIENCE

Baker / Customer Service — Uncle Tetsu Canada
Sep 2025 – Present

Toronto, ON · Present

- First point of contact for walk-up customers at a high-volume bakery; manage the order queue and process payments during peak hours
- Prepare and serve orders and handle day-to-day store operations

Android Developer — Zoho Corporation
Nov 2021 – Dec 2022

Chennai, India · 13 months

- Built and maintained native Android features for a communication app with 100,000+ active users, shipping across multiple sprint releases in an Agile/Scrum environment
- Reduced application crash rate by 25% through systematic debugging, memory profiling, and targeted refactoring of concurrency issues
- Improved real-time call stability by 30% by implementing WebRTC-based audio/video transport protocols
- Integrated REST APIs using Retrofit and OkHttp, achieving 99.5% client-backend communication uptime across all production builds
- Authored technical documentation that cut developer onboarding time by 40%, standardising internal knowledge across the Android team
- Collaborated daily with iOS, backend, and QA teams in cross-functional Agile standups and sprint reviews

Technologies: Kotlin · Java · Jetpack Compose · MVVM · Clean Architecture · Retrofit · OkHttp · WebRTC · Android Studio · Gradle · Git · JIRA

Associate Software Developer (AEM Platform) — Accenture (Client: Chubb Insurance)
Jan 2021 – Oct 2021

Bangalore, India · 10 months · Fortune 500 client

- Managed digital content operations for an enterprise Adobe Experience Manager (AEM 6.x) platform serving millions of end users across Chubb's global web properties
- Published and maintained 100+ web pages; reduced page authoring time by 30% by building and standardising reusable AEM component templates
- Administered AEM DAM workflows — asset ingestion, metadata tagging, rendition publishing, and multi-environment deployment across Dev/QA/Prod
- Performed QA including cross-browser testing, link validation, mobile responsiveness checks, and WCAG 2.0 accessibility compliance audits
- Coordinated with UX designers, content strategists, and offshore developers across multiple time zones using JIRA and Confluence

Technologies: Adobe Experience Manager (AEM) 6.x · AEM Sites · AEM DAM · Touch UI · HTL/Sightly · JIRA · Confluence

EDUCATION

Post-Graduate Diploma — Big Data Solutions Architecture
May 2024 – Dec 2024

Conestoga College, Kitchener, ON

Hadoop · Spark · Kafka · Data Structures · Algorithms · Database Systems · Big Data Analytics

Post-Graduate Diploma — Data Analytics for Business Decision Making
Sep 2023 – Apr 2024

Durham College, Oshawa, ON

Python · SQL · Statistical Analysis · Machine Learning · Data Visualization · Predictive Modeling

Bachelor of Engineering — Computer Science
2016 – 2020

Sri Sai Ram Institute of Technology (Anna University), Chennai, India

SKILLS

Languages: Java · Kotlin · Python · SQL · R · JavaScript · HTML · CSS · HTL/Sightly

Mobile: Android SDK · Jetpack Compose · Room · Hilt/Dagger · Coroutines/Flow · WorkManager · Bluetooth/USB APIs · MVVM · Clean Architecture · Retrofit · OkHttp · Gradle

Web / Backend: Spring Boot · Spring MVC · Spring Data JPA · REST APIs · Maven · Thymeleaf · MySQL · Next.js

CMS / Platform: Adobe Experience Manager (AEM) Sites · AEM DAM · Touch UI · OSGi (exposure) · Sling (exposure) · JCR · Apache httpd (Dispatcher-style config)

Data: Hadoop · Spark · PySpark · Kafka · Apache Beam · PostgreSQL · ETL · pandas · seaborn · plotly · Tableau · Power BI

OS: Red Hat certified (expired) knowledge in Linux platform

Tools: Android Studio · IntelliJ IDEA · VS Code · Git · GitHub · Docker Compose · JIRA · Confluence · Jenkins (exposure)

Methods: Agile/Scrum · Code Review · Unit Testing · SOLID Principles · MVVM · Factory · Repository

PROJECTS

Cheesecake Business Website (Headless Sling) | Sling · OSGi · JCR · Next.js Apr 2026 – May 2026

- Built a website for my Japanese cheesecake vending business on a stack that mirrors AEM headless architecture
- Wrote OSGi servlets (Declarative Services annotations) that serve JCR content as JSON at AEM-style persisted-query URLs to a Next.js frontend
- Packaged menu and event content as a FileVault content package, the same mechanism AEM uses for content deployment
- Configured an Apache httpd Dispatcher layer with reverse proxying, 5-minute disk caching, and dual-layer blocking (403) of admin paths
- Ran Sling, the Dispatcher layer, and the Next.js frontend together with Docker Compose on a shared network

github.com/ash6898/cheesecake-site-headless

Real-Time Data Pipeline (Lambda Architecture) | Kafka · Beam · PySpark Mar 2026 – Apr 2026

- Streamed live Wikimedia recent-change events (SSE) through a Python producer into Kafka (KRaft), with Docker Compose infrastructure
- Aggregated article edits per wiki in 60-second Apache Beam windows, stored in PostgreSQL
- Ran PySpark batch analytics on edit velocity, top wikis by edit count, and bot-vs-human edit ratios

github.com/ash6898/wikimedia-pipeline

AEM Component Library | HTL · Sling Models · OSGi · Java · Maven Apr 2026

- Built 7 reusable HTL components (page, header, hero banner, section title, project card, contact form, footer) backed by 4 Sling Models, with clientlibs and a multi-module Maven build (core, ui.apps, ui.content)

github.com/ash6898/aem-component-library

E-Commerce Web Application | Java 17 · Spring Boot · JPA · MySQL Feb 2026

- Built Big Star Collectibles, a Spring Boot e-commerce site (Thymeleaf, MySQL) with JPA repositories, user registration with validation, a searchable product catalog, and a session-based shopping cart
- Added a REST API with custom exception handling, request interceptors, and English/Tamil internationalization (i18n)

github.com/ash6898/BigStarCollectibles

News Streaming Pipeline (Conestoga, Academic) | Kafka · HDFS · Spark Streaming Dec 2024

- Moved News API articles through a Kafka producer and consumer into JSON files on HDFS, then ran Spark Structured Streaming aggregations of articles per author and per source using 10-second watermarked windows

github.com/ash6898/Bigdata-Final-Project

Customer Churn Prediction (Durham, Academic) | Python · Machine Learning · Jupyter

- Built a churn prediction model with 84% accuracy using a voting ensemble (logistic regression + random forest) to identify at-risk customers
- Performed exploratory data analysis, Isolation Forest outlier detection, and feature engineering; evaluated models with ROC/AUC and weighted recall

CERTIFICATIONS

- Adobe Certified Expert — AEM Sites Developer Professional (AD0-E123) · In progress
- CompTIA A+ — Core 1 (220-1201) passed, 802/900 · July 2026 · Core 2 (220-1202) in progress
- LinkedIn Learning: Object-Oriented Programming with Java · Introduction to Data Science in Python · Analyze Box Office Data with Seaborn · Analyze Box Office Data with Plotly
